### **FINISHED PROJECTS**

- TAP Rundown System
  - Developed a system for Purchasing Department to forecast the Incoming and Outgoing spare parts of the machine parts in Toyota Autoparts Philippines. The system can receive a delivered parts from the supplier and the system automatically adjust and forecast the inventory material based on daily needs and components of one machine.
- Fixed Asset Management System (Web-based)
  - Developed a system for Finance Department in Clarmil Mfg. Inc. All the assets of the company can easily access and view with this system. The system can filter what is the current location and depreciation of the assets in department and who are the personnel assigned in assets. The major modules are: Asset Masters, Asset Components, Maintenance, Attachment, Asset Log History, Check-in and Check-out, Lapsing, Depreciation, Print Barcode Label.
- Enterprise Resource Planning (ERP Web-based)
  - A Team project for company-wide system project. The system provides and covers variety of essentials functions that integrates every department, the system also streamline every department workflows to better decision making. Major modules: Sales and Delivery, Purchasing, Receiving, Inventory, MRP, and Reporting

- Warehouse Information Management System (Web-based)
  - Developed a system for Warehouse Department. The system can suggest on what location or bin of the incoming raw materials, also the user can easily retrieve and view the current stock of the raw materials based on location or bin. The major modules are: Put Away, Picking, Replenishment, Inventory Transfer, Inventory Count, Tasking, and Reporting.
  
- Human Resource Information System (Web-based)
  - A team project for company-wide system project. The employee can easily apply leaves, viewing DTR, leave status. My modules contribute are: Performance Management System, Time Keeping Reporting, and Recruitment Management System.
  -
  
- Online Grading System with Enrollment System
  - Developed a system for Public and Private Schools. The system is ready for K-12. The system can assign classes, subjects, and section of the student and also the teachers of the schools. System can manage Character Grading Symbols, Student Performance, and Transmutation Table and configure the formula of the grades. The students and parents can easily view the current grades and performance.
  -
  
- Hospital Management System (Web-based)
  - Manage the entire patient care workflow, the system provides the necessary tools for physicians to complete all procedures and administrative tasks associated with a patient visit. Major modules are: Patient Management, EMR, Out-Patient, In-Patient, Doctor and Nurse Workbench, User Management, Ward Management, Billing Module, and Reporting.
  -
  
- RESINC Website
  - Developed and maintained company website. The website develops in PHP OOP script and MySQL database with the used of REST API for fetching data from server database. The Website has Admin Panel that user can easily maintain and add pages in website just like CMS.
  -
  
- ROWELL MARINE
  - Developed and maintained client website. The website main products are Boats, yacht. Also the website has admin panel that user can easily modify the content of the website like CMS. User can add/edit/delete boat details such as availability and pricing for renting the boats. The website develops in PHP OOP script and MySQL database with the used of REST API for fetching data from server database.
